## wellMap

Optimize operations and improve decision making with a digital twin of the well.

## drillView™ GHOST

Access offshore dashboards for common situational awareness from anywhere.

## eTally™

Automate and digitalize pipe tallying, enabling automation of other drilling processes.

## taskBoard

Organize teamwork and improve efficiency by knowing what's done and what needs to get started.

TURN PAGE FOR MORE

## mudView™

Manage your mud systems with inventory control and plan for automated mud handling.

## beAware™ ADVANTAGES

### OEM AGNOSTIC

Implementation possible on any rig, irrespective of topside OEM.

### EASY INSTALLATION

Process is designed to minimize or eliminate disruption of operations.

### FULL OVERVIEW

Collects and displays all operational information from/to all actors.

### INCREASED SAFETY

Solutions are designed to provide situational awareness to all parties.

# beAware™ taskBoard

INFORMATION  
SHARING  
PLATFORM

**Get on the same page!**  
**Drill the well with enhanced transparency and synchronization for optimal results.**

**taskBoard** consolidates all parties information on a single platform, displaying completed, ongoing and upcoming tasks, while allowing for live comments and feedback. This centralized solution enhances drilling safety, speed, and efficiency.

## taskBoard ADVANTAGES

TASK COMPLETION DOCUMENTATION	OVERVIEW OF UPCOMING ACTIVITIES	FEEDBACK SUBMISSION
See and share crucial information when performing handover.	View all tasks in one shared platform.	Add comments to ensure optimal communication with involved parties.
<ul style="list-style-type: none"> <li>✔ Past 24 hours history</li> <li>✔ Displays ongoing, upcoming and completed tasks</li> </ul>	<ul style="list-style-type: none"> <li>✔ Highlights overdue or critical tasks</li> <li>✔ Filters tasks relevant for your team or role</li> </ul>	<ul style="list-style-type: none"> <li>✔ Direct communication between parties</li> <li>✔ Transparency in communications</li> </ul>

I know all what's going on.

When a task is confirmed, things are automatically updated, like if I mix something, I get the receipt from Mud Engineer, and once this is done the logistics are updated as well as the content in the pit.

I like how it is all connected.
